## EXPERIENCE

### TomTom

*Software Engineer, Machine Learning*

Amsterdam, Netherlands

*since Feb 2019*

- Direct supervision of master thesis students resulted in work submitted for review at **ICLR** 2021 [1].
- Developed novel production-grade semantic segmentation models improving the overall precision by **4.1%**.
- Maintained components of a pipeline for automated HD map production using **AWS, Docker, Jenkins**.

### Volkswagen ML Research Lab

*Intern, Master thesis*

Munich, Germany

*Dec 2017 – Aug 2018*

- Developed a novel probabilistic neural network architecture learning approach using variational inference.
- Increased the accuracy of Bayesian convolutional networks on small datasets by up to **4%**.
- Published as a conference paper at **AISTATS** 2019 [2], also presented in this blog post.

### École Polytechnique

*Research Internship*

Paris, France

*Aug 2017 – Nov 2017*

- Implemented a person identification attack on a GPS trajectories dataset using recurrent neural networks.
- Exposed undesirable properties of common differential privacy mechanisms wrt. utility of the protected dataset.
- Published as workshop conference paper at **LocalRec ACM SIGSPATIAL** 2019 [3].

## EDUCATION

### Technische Universität München

*M.Sc. Computer Science*

Munich, Germany

*Apr 2016 – Sep 2018*

- Thesis on Bayesian neural network architecture learning at the **Volkswagen ML Research Lab**.
- Coursework in machine learning and computer vision with work published at **3DV** 2020 [4].
- Participation at the **DeepBayes** 2018 summer school on probabilistic deep learning in Moscow, Russia.
- GPA: 1.3 (1.0 highest, 4.0 pass)

### Technische Universität München

*B.Sc. Computer Science*

Munich, Germany

*Sep 2012 – Mar 2016*

- Thesis on stereo-vision with spiking neural networks, published as a conference paper at **Living Machines** 2017 [5].
- Exchange semester at Université Pierre et Marie Curie, Paris, France.

## PROJECTS

### Hypertunity | Python, Slurm, Tensorboard

*Jul 2019 – Oct 2019*

- A Python library for black-box hyperparameter optimisation, in particular Bayesian optimisation.
- Supports Tensorboard visualisation and distributed scheduling of experiments using Slurm.
- Open-sourced with continuous integration and documentation, see <https://hypertunity.readthedocs.io>.

## SKILLS

**Programming Languages:** Experienced with Python. Familiar with Java, C, R, Haskell, Bash.

**Technologies:** Linux, Git, AWS, Docker, L<sup>A</sup>T<sub>E</sub>X.

**Spoken languages:** Bulgarian (native), English and German (fluent), French (conversational).
